

**This pen is small and portable it can be taken anywhere and used to record conversations, or meetings. Listen to play back with earphones or attach to your computer via the USB connection. This is a functioning ballpoint pen as well as a voice recorder and MP3 Player. This is a great addition to your briefcase.**

**For taking notes and recording important dates or phone numbers. No longer will you have to sift through hundreds of notes to find what you want . Use it for repeating directions while on your cell phone. Or for help to memorize client names. Nothing says professional like being able to remember everything. Just play it back later and take notes. As many salesmen know remembering the little details can be the difference between a sale and a no sale.**

### LV-1051
